2026 GUIDEBOOK

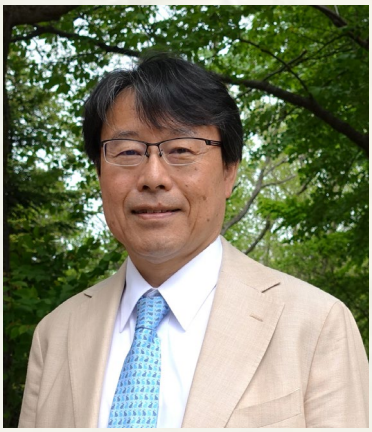

Hokkaido University

Faculty of Health Sciences
Graduate School of Health Sciences
Department of Health Sciences, School of Medicine

Message from the Dean of the Faculty of Health Sciences

Professor Akihiro ISHIZU
Dean of the Faculty of Health Sciences

The history of Hokkaido University dates back to the foundation of Sapporo Agricultural College in 1876. Its School of Medicine was established in 1919, the year following the college's upgrade to Hokkaido Imperial University in 1918. Then the technical schools affiliated with the School of Medicine started producing healthcare professionals. The lead-off was the education of nurses in September 1920 commenced a year after the School of Medicine was established. Other programs were also created to teach students to become midwives in October 1921, clinical radiologists in April 1956 and clinical laboratory technologists in April 1966. Subsequently, nurse education was redesigned and began at the College of Medical Technology, Hokkaido University, in October 1980. The College launched new programs to produce physical therapists and occupational therapists in April 1981 and progressively took over the education for clinical laboratory technologists and clinical radiologists. The history continued in 2003, when the Department of Health Sciences was established within the School of Medicine. It was followed by an institutional reform from 2004 to date to provide a four-year education in five specialized majors such as nursing, radiological technology, medical technology, physical therapy and occupational therapy. The inauguration of the Graduate School of Health Sciences in April 2008 celebrated the launch of new master's degree programs, followed by that of doctoral degree programs in 2010. At the Graduate School of Health Sciences, in addition to the specialized fields and the courses taught corresponding to the health professions which students hope to pursue, we offer those in health sciences aiming to open doors to people with backgrounds in veterinary medicine, pharmacology, science and engineering, agriculture and human sciences to seek new developments as an educational institute.

At our institute, over 70 faculty members are engaged in health science research in six departments including Fundamental Nursing, Comprehensive Development Nursing, Biomedical Science and Engineering, Medical Laboratory Science, Rehabilitation Science, and Health Sciences and Technology together with two endowed chairs. Health sciences encompass a broad research area which includes medical topics such as "What it means to be healthy", "What we need to do to maintain health" and "What we should do when health is compromised". The faculty members of our institute include not only researchers with healthcare professional qualifications such as medical doctors, nurses, clinical radiologists, clinical laboratory technologists, physical therapists and occupational therapists but also researchers from diverse backgrounds including veterinary medicine, pharmacology, science and engineering and education.

We in our civilization are now faced with many challenges ranging from global climate change, inconceivable disasters, pandemics of emerging infectious diseases as an existential threat to humanity, conflicts and declining birth rates in aging societies. What matters most is the health and well-being of people even in such circumstances, and I believe that the mission of our research institute is to find out what we can do to maintain people's health. Although we face stacks of challenges ahead, our faculty and staff are committed to playing as a strong team to address every challenge with all of our wisdom and power while leveraging the strength of diversity within our team.

Hokkaido University celebrates its sesquicentennial this year – 2026 is when we spur ourselves to pursue broader social objectives. That is, the University aims to contribute knowledge and outcomes from research back to society and address unsolved issues with communities while striving to attain research excellence. To commemorate the sesquicentennial, a young Japanese elm tree was planted in the Health Sciences' courtyard where our new community project forms a hub of activity with local residents. The planted tree brings to mind Mary Patterson Elkinton, the devoted wife of Inazo Nitobe. He was initially a member of the second annual graduating class of Sapporo Agricultural College, taught students there and was later to write "Bushido: The Soul of Japan". It is believed that Mary felt a deep attachment to the university and Sapporo where she spent 7 years of her life with Inazo, and she donated 24 Japanese elm trees to our campus in 1905. We are, and our successors will be, excited to watch this infant elm tree establish itself well for over fifty or a hundred years symbolizing the development of collaborative partnerships between the Faculty of Health Sciences and the local and international communities for generations.

History

1920	The Medical Clinic attached to the School of Medicine in Hokkaido Imperial College adds the Nursing Course.
1945	The Nursing Course renamed the Women's College of Health and Welfare.
1951	The Women's College of Health and Welfare renamed the School of Nursing attached to the School of Medicine in Hokkaido University (abolished in 1983).
1956	The School of Medicine adds the Medical X-Ray Technicians' School (later the Technical School of Clinical Radiology, abolished in 1986).
1966	The School of Medicine adds the Sanitary Inspection Technicians' School (later the Tecnicial School of Clinical Laboratory Science, abolished in 1984).
1980	The College of Medical Technology established (abolished in 2007).
October 1, 2003	The Department of Health Sciences established in the School of Medicine.
April 1, 2008	The Faculty of Health Sciences and the Graduate School of Health Sciences established. Master's degree programs established in the Division of Health Sciences of the Graduate School.
August 1,2008	A Double Degree Program established in partnership with the MBA program offered by Otaru University of Commerce.
January 1, 2010	The Donated Research Department of Food and Nutrition for Health Promotion established.
March 31, 2010	The Division of Health Sciences celebrates its first master's alumni.
April 1, 2010	Doctoral degree programs established in the Division of Health Sciences.
October 1, 2011	Health Innovation and Technology Center (HITEC) established in the Faculty of Health Sciences.
April 1, 2012	Education Research Center for Health Professionals established in the Faculty of Health Sciences.
March 31, 2013	The Division of Health Sciences celebrates its first doctoral alumni.
July 5, 2013	Inaugural FHS International Conference (FHS2013) held in Sapporo, Japan (held biennially thereafter).
March 28, 2014	The Research Building E's construction completed and the existing Building A, B, C and D renovated in the Faculty of Health Sciences.
September 1, 2016	The Donated Research Department of Biological Response and Regulation established (transferred in January 1, 2024).
July 1, 2019	The Donated Research Department of Emergent Neurocognition established (terminated in June 30, 2023).
April 1, 2020	The existing Department of Rehabilitation Science and the Department of Functioning and Disability integrated into the reformed Rehabilitation Science Department of the Faculty of Health Sciences.
April 1, 2020	The Donated Research Department of Data Health Innovation established (terminated in December 31, 2023).
April 1, 2022	The Committee of International Affairs renamed the International Affairs Office.
April 1, 2025	The Donated Research Department of Community Co-creation Model established.
April 1, 2026	The Donated Research Department of Orthopaedic Sports Science established.

Schools and Faculty

Department of Health Sciences, School of Medicine

5 Divisions

Nursing	Nursing
Radiological Technology	Radiological Technology
Medical Technology	Medical Technology
Physical Therapy	Physical Therapy
Occupational Therapy	Occupational Therapy

Undergraduate Degree Programs

Graduate School of Health Sciences

2 Degree Program Areas in Master's / Doctoral Levels

	Master's	Doctoral
Nursing	Nursing Science Advanced Public Health Nursing Advanced Midwifery Advanced Practice Nursing	Nursing Sciences
Health Sciences	Biomedical Science and Engineering Medical Laboratory Science Rehabilitation Science Health Research Studies	Advanced Medical Sciences Comprehensive Health Sciences

Graduate Degree Programs

Faculty of Health Sciences

6 Research Groups and 3 Endowed Research Groups

- Fundamental Nursing
- Comprehensive Development Nursing
- Biomedical Science and Engineering
- Medical Laboratory Science
- Rehabilitation Science
- Health Sciences and Technology

Endowed Research Groups

- Food and Nutrition for Health Promotion
- Community Co-creation Model
- Orthopaedic Sports Science

Core Research Laboratory

Health Innovation & Technology Center

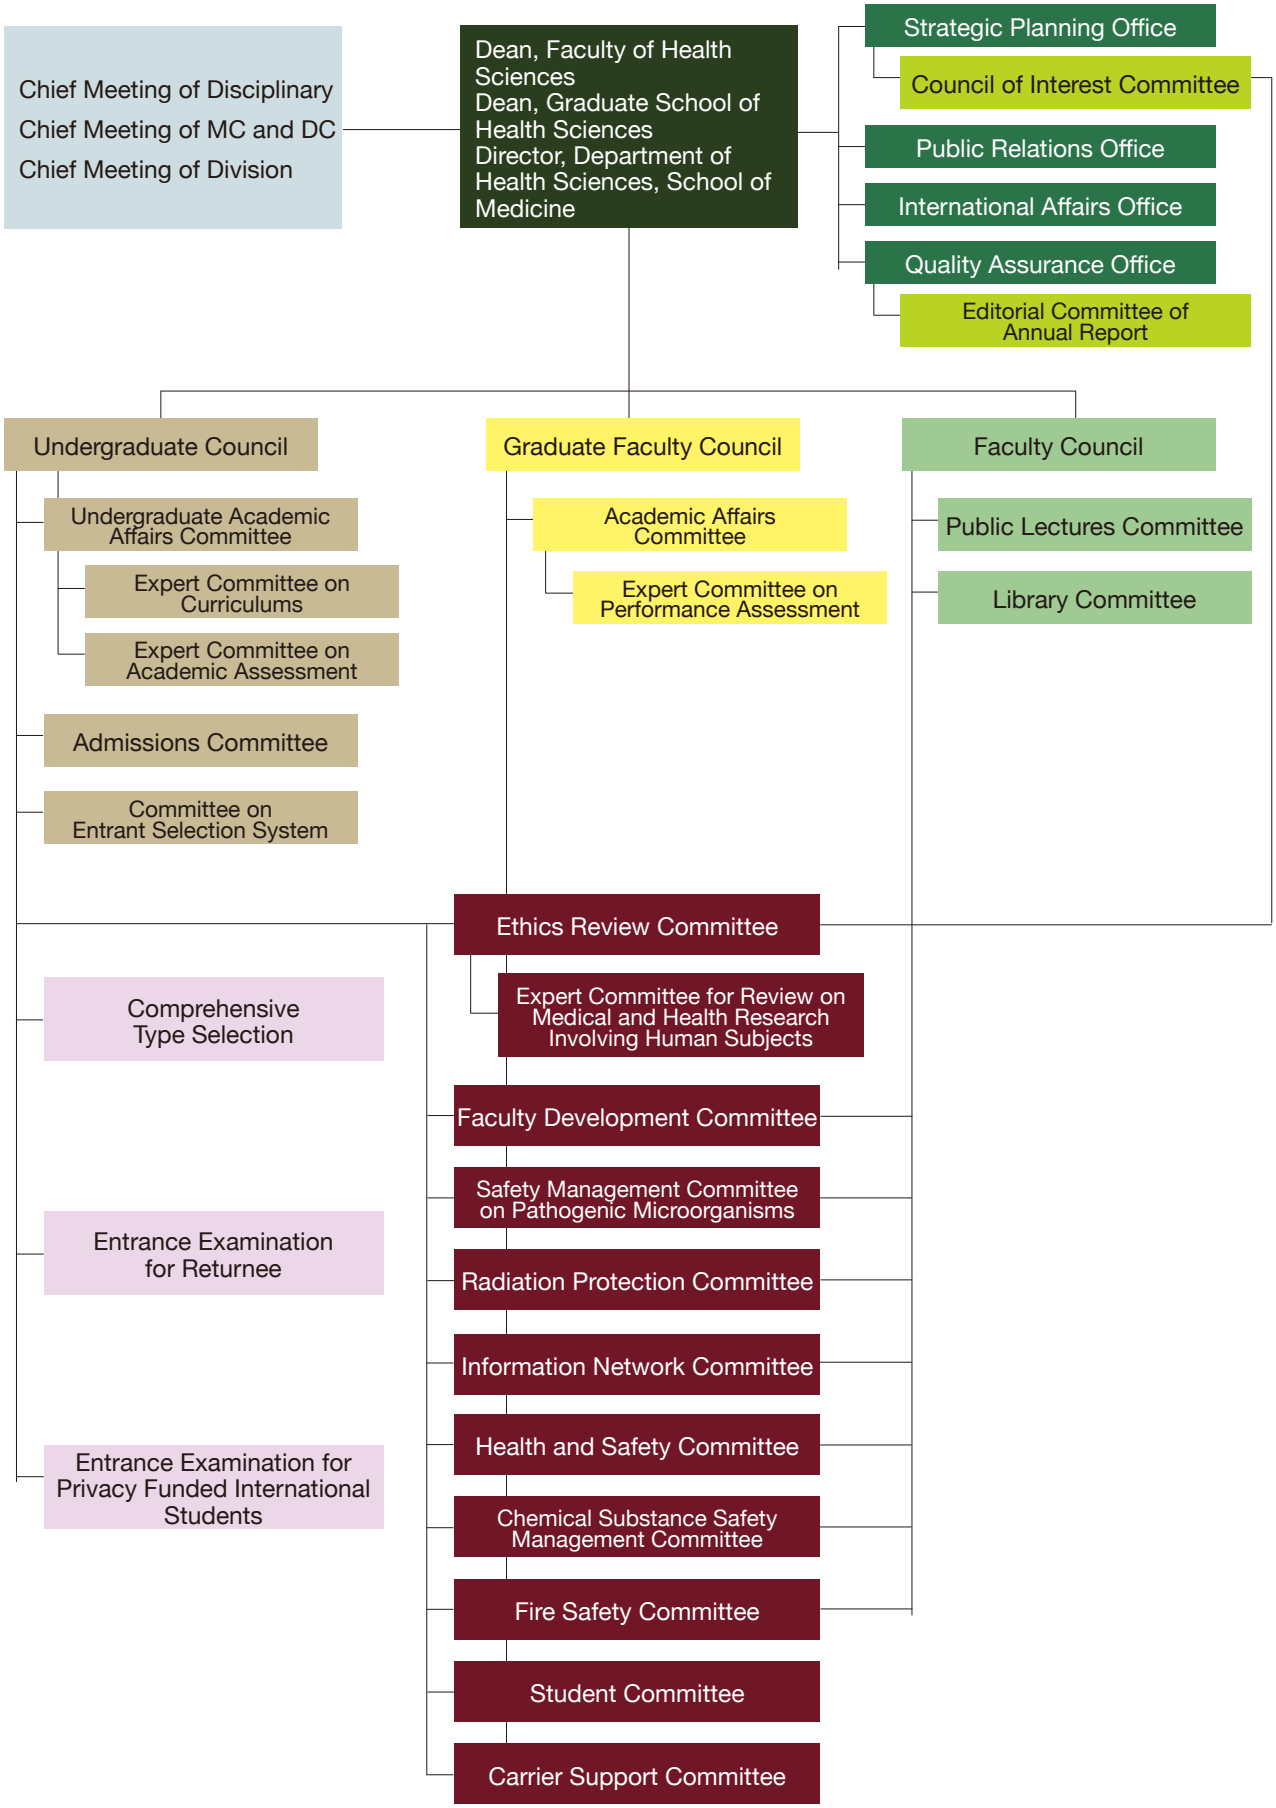

- Laboratory for Advanced Lipid Analysis
- Section of Health Network System
- Division of Biological Function Analysis
- Division for One-Health Studies

Education Research Center for Health Professionals

- Division of Healthcare Research and Education
- Division of Advanced Education Reform
- Division of Community Healthcare Collaboration
